PDH Day
Atlanta, Georgia
October 23, 2009
8:00 am – 5:00 pm

CALL FOR SPEAKERS/TOPICS

Continuing Professional Education is the lifeblood for competent engineering practice and is required for license renewal. The Annual **PDH Day** seminar is a convenient, cost-effective way to meet both needs. Although lunch is served, the entire day is devoted to training – no banquets, awards, hotels, board meetings, etc. There will be several concurrent tracks to appeal to a variety of technical disciplines and professional interests. In previous years, we have held sessions related to engineering business and management, professional/ethics/ licensing, mechanical/electrical/buildings, and public works (environmental/transportation). The organizing committee is seeking suggestions for topics that are relevant to your practice/interest as well as speakers on these topics or others. Sessions are generally 1-2 hours long, although some sessions may extend to half-day or even longer if the subject matter requires it. Suggestions are invited on any topics, but examples include topics leading to special certifications, construction codes, licensing, new state environmental policies/rules, HVAC design, project case studies, new business opportunities, project management, liability control, etc.

Proposed topics and speakers are especially welcomed from society members, sustaining firms, and associate members.

Session Topic: _____

Speaker (optional): _____ E-mail: _____

Company: _____ Phone: _____

Duration: _____ hours

Description (attach additional information if appropriate):

Your Name (if different from above): _____

E-mail: _____ Phone No. _____
